Problem Solving Skills

PROFILE

B.Tech Computer Science junior with a flair for programming in C, C++, and Core Java. Proficient in web development using HTML, CSS, JavaScript, and React. Skilled in MySQL, Git, GitHub, and Tailwind CSS. Well-versed in Data Structures and Algorithms, and currently diving into React for web development. Eager to bring my skills to a dynamic work environment.

PERSONAL PROJECTS

Hungry Hub (Swiggy Clone)

- October 2023

- Develop a web application that replicates the core features of the Swiggy app, allowing users to browse nearby restaurants, view their menus, and place orders for food items.
- Design a highly responsive and user-friendly interface that adapts seamlessly to various devices and screen sizes, ensuring an enjoyable and accessible experience for all users.

Blood Bank Management System

- April 2023

- A project focused on streamlining blood donation and availability.
- Users can search for nearby blood availability based on blood type and location
- Users can search for nearby blood availability based on blood type and location
- Blood banks can add and update their blood availability in real-time.

IoT Based Smart Switch

- August 2022

- A project focused on controlling electronic appliances using a web browser.
- Utilizes a user-friendly web interface for seamless and intuitive appliance control.

INTERNSHIP

WEB DEVELOPMENT (REACT)

- Niveshan Technologies India Pvt Ltd

- During my 45-day training on Web development, I successfully created a HungerHub WebApp using **REACT-JS & Tailwind-CSS**.
- Successfully integrated real-time data from Swiggy API
- Mastered version control and collaborative coding using Git and GitHub

IOT based Product Development

- Organized by PIET AICT Idea Lab

- During my 15-day training on IoT-based product development, I successfully created a smart switch that allows for the control of electronic appliances using a web server.
- For the hardware component, I utilized the ESP-32 microcontroller.
